# WORLD PHOTOGRAPHY DAY 2022

# WORLD PHOTOGRAPHY DAY 2022

- ? Every year on August 19th, World Photography Day (also known as World Photo Day) celebrates the art, craft, science, and history of photography. The day also encourages photographers from around the globe to share a single photo that encapsulates their world.
- ? The kind of photography we know today dates back to 1839. At that time, the French Academy of Sciences announced the Daguerreotype process. The process made it possible to create a highly detailed image on a sheet of copper. The sheet was coated with a thin coat of silver, and the process did not require the use of a negative. It became the first method for obtaining a permanent image with a camera.

**CONGRATULATIONS  
ALL ARTISTS**
